## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. This office action is in response to the correspondence filed April 22, 2004.
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-4 are is rejected under 35 U.S.C. 103(a) as being unpatentable over Wilk (US 5,544,651) in view of Giger et al. (US 5,931,780).

Regarding claim 1, Wilk discloses an automatic patient treatment medical system comprising: a first radiology step in which a patient is scanned by a radiology device to produce a first analog image of an area; a second radiology step in which patient is scanned by the radiology device to produce a second analog of the area (column 7, lines 5-14); a first conversion step in which the first analog image is converted into a first digital image signal which may be stored in the computer; and a second conversion step in which the second analog image is converted into a second digital image signal which may be stored in the computer (column 7, lines 15-38); a comparing step in which the computer identifies changes in the area by comparing the area first digital image signal with the second image signal (figure 3, element 54).

Wilk discloses the area being imaged is various body organs without specifically being identified as area of interest.

Art Unit: 2625

In the same field of endeavor, however, Giger discloses a computerized radiographic imaging system comprising the areas being imaged are areas of interest (column 10, lines 20-50).

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to use the area of interest as taught by Giger in the medical imaging system of Wilk because Giger provides Wilk with a routinely used medical process of comparing areas of interest to quantitatively determine the change in medical condition of a given body part. Additionally, such process being routine is further evidenced by the other prior art made of record in this office action.

As to claim 2, Wilk discloses a system wherein the first and second radiology steps are performed on X-ray machine (column 6, lines 3-10).

As to claims 3-4, Wilk discloses a system wherein the first and second radiology steps are performed on MRI or CAT machine (column 7, lines 5-15).

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will

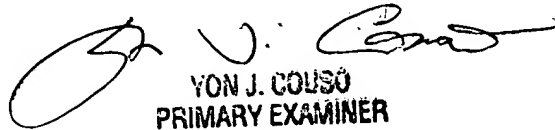

Art Unit: 2625

the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
